

Rajan Kumar

Full Stack Web Developer

PROFESSIONAL SUMMMARY

Hold a B.Sc. in Mathematics Honors (2019) and pursued Full Stack Development at Masai School, mastering technologies Frontend and Backend. Engaging in numerous projects refined my practical skills, fostering effective teamwork, timely project delivery, and high-quality results. Worked as a Full Stack Web Developer for six months at Eduuis, and currently interning at Codeway. Eager to leverage this expertise in a dynamic tech environment.

WORK HISTORY

june 2023 - November 2023

Full Stack Developoer, *Eduuis*, Mohali, Chandigarh, Remote

- Developed a robust REST API as the foundation of the parental control Android app at Eduuis. Implemented key functionalities for secure data exchange and seamless communication between app components.
- Integrated Firebase Cloud Messaging (FCM) library to enable efficient push notifications for users. Enhanced real-time communication, allowing parents to receive timely updates and alerts about their children's digital activities.
- Leveraged Cron for task scheduling and automation, optimizing app efficiency and improving the overall user experience. Streamlined routine processes, providing a hassle-free means for parents to monitor and safeguard their children's online activities.
- Designed and developed an intuitive admin panel using React. Empowered administrators with a user-friendly interface to manage user accounts, monitor analytics, and make informed decisions to enhance app effectiveness.
